Transform the way you work

FUJI XEROX

The smartest technology investments do more than pay for themselves.

Ideally, they integrate and streamline multiple office processes, simplify complex tasks, and free up company resources so you can devote more energy to growing your business.

And in today's competitive environment, choosing the right technology provider means getting more than the latest bells and whistles. You need a complete solution that delivers efficiencies you never imagined – one that solves problems now, while also providing the framework you need to stay one step ahead of potential workflow obstacles.

You need more than a technology vendor. You need a partner who helps you find new ways to get more work done in less time.

Smooth, impressive client presentations

Eliminate the hassle and worry of lugging around bulky, confidential documents.
Working Folder, our Cloud-based document sharing service, keeps your documents secure and your briefcase light.
Use a PC or Fuji Xerox multifunction device to store documents in Working Folder, then access and view with a smart device while at your client's office.
You can also print from a tablet or smartphone to multifunction devices when out of the office via wireless LAN.

ApeosPort for simplified, secure document management

Featuring excellent scalability and customisability, ApeosPort boasts a galaxy of functions that also streamline management tasks and secure confidential information.
Users can now focus on work, assured of fast, easy access to shared information across the entire company.

- Link with an external authentication server
- Register frequently performed tasks for smoother workflows
- Encourage cost-cutting
- Restrict user permissions and limit printing/copying
- Log usage to monitor operations
- Monitor usage with UUID and image logs

* Requires optional ApeosWare Management Suite.

Smoother application of information

Tablet device can also be used for printing.

You can also use your iPhone or iPad, or Android™ device to print via a wireless LAN access point. This ensures more smooth and speedy leverage of information.

The easy-to-use control

Panel can be set to use single-touch, easily recognisable icons for frequently used functions. Four different gestures — tap, double-tap, drag and flick — can be used to scroll and switch pages smoothly and quickly.

Flick

Touch the screen with your finger, and simply swipe the screen with your finger to scroll and switch pages.

Drag

Touch and hold a control such as buttons with your finger, and then slide your finger to move it.

Tap/Double-tap

Tap the screen (twice) with your finger to make a selection or decision.

Various File Formats and Processing Supported

Users can convert scanned documents and data to numerous file formats including TIFF, JPEG, DocuWorks document, PDF and XPS[1] before you send them by email. OCR processing can assist in searching for and compressing documents to reduce their size for e-mail communications [2], and password settings can also be set.
*1: Stands for XML Paper Specification.
*2: Optional.
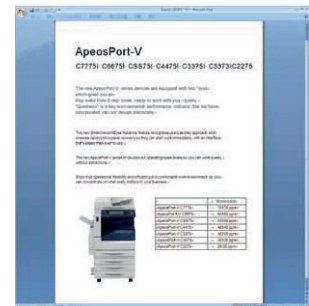

Conversion to Editable Word and Excel® Files

Scanned data can also be converted to files in Word or Excel® format, and hardcopy documents can be convert ed into editable digital documents. The ApeosPort-V series devices can also convert tables and illustrations to objects suitable for reproduction with Word and Excel®.

* Optional.
  An auxiliary function that allows you to reuse materials such as text, tables, shapes, and photos on paper documents. However, we cannot guarantee the accuracy when they are reused.

Remote Power Control (Power Off)

Devices located some distance from system administrators may be switched off remotely by PC. In large facilities such as a campus or factory building, this function can reduce the time and labour required to walk to every device and switch it off individually.

A Wider Product Lineup for Effective Deployment and Management

This series is noted for high environmental performance thanks to advanced technologies such an IH-Fuser and LED print head, and now provide 25 to 70 sheets/minute. Thus users can share common operability and consumables among several machines, if introduced. The machines, having instantaneous force to wake up from Sleep Mode in 3.1 seconds*, will answer the requirements for high-speed processing and strategic deployment.

* For ApeosPort-V C3376/C3374/C2276. 10.5 seconds for ApeosPort-V C5576/
  C4476. 14.0 seconds for ApeosPort-V C7776/C6676.

Duplex Automatic Document Feeder Offering High Productivity

Duplex Automatic Document Feeder on the machine is equipped with the "one path duplex scanning feature" to scan both sides of a duplex document at one time, realizing high speed scanning of 150 pages/minute* for both colour and monochrome originals. Besides holding up to 130 sheets of documents, the light weight design, weighing only 11 kg, assists smooth operation for users to open/close it. This provides offices with high productivity.

* With Automatic Document Feeder B1-PC.160 pages/minute when Quiet Mode
  is set to OFF.

Support for banner printing

You can now print beautiful posters in your office with the ApeosPort-V series of devices. They are capable of handling paper sizes up to 320 mm x 1200 mm, opening up a range of new print and copy possibilities.

* Printable area is 305 x 1194 mm.
* Long-paper printing is not supported when a finisher is attached.
* Only supports PCL driver and Windows® of Adobe® PostScript® 3™.

Light and Heavy Paper Support

The ApeosPort-V series can handle a wider range of paper weights than ever before. The standard paper tray supports weights from 52 gsm up to 300 gsm*. This provides opportunities to create a broad range of business documents and reports, as well as marketing materials such as journals and POS material.

* Documents may not be printed correctly depending on usage conditions.

Hole punched paper and envelope are also supported

Punched paper suitable for filing is supported. Also, no wrinkles occur during printing on envelope of up to 70 gsm, which is usually used.

Print in different environments

The ApeosPort-V series can be shared and printing can be performed in two independent network environments. With two network ports, you can maximise the use of the multifunction device while maintaining tight security of having separate network.

* Optional.
* Print function only. Supported protocol: TCP/IP (lpd, Port9100) only.

Easy printing wherever you are

Print Utility for iOS / Android

This free Fuji Xerox application lets you output web pages, pictures, DocuWorks and PDF documents[1], and import scanned documents to mobile devices. You can configure it to print N-up and duplex. Server-less On-demand printing[2] is also available by assigning authentication information. Additionally, the application is supported by standard printing frameworks on Android™ OS 4.4 or later. More applications allow output using Print Utility for Android.

   * Print Utility can be downloaded for free from the App Store (iOS) or
      Google Play™(Android).
   *1: Outputting DocuWorks and PDF documents requires DocuWorks Viewer
       Light for iPhone/iPad or DocuWorks Viewer Light for Android.
   *2: Optional.

Google Cloud Print

By registering the multi-function device with Google Cloud Print, you can output documents via the cloud from Android™ devices, Chromebook™ and computers. Giving permission to office visitors provides them with a printing environment without connecting to your Intranet.

* Google Could Print is a web printing service from Google.

Wi-Fi Direct®

Wi-Fi Direct® can be used with a wireless LAN adaptor. You can connect personal mobile devices directly to the multi-function device then print. Using a wireless LAN access point allows you to separate connections from business mobile devices and computers on an Intranet.

* Optional.

AirPrint

Supports AirPrint, iOS and OS X standard print functions. You can output e-mails and documents created with Apple applications, including Safari, Map, Numbers, Pages and Keynote, and Microsoft applications such as Word, Excel® and PowerPoint®.

Mopria™ Print

You can output on a Mopria-certified device from Mopria Print Service* installed on mobile devices without installing different printing applications of models or manufacturers.

* Mopria Print Service can be downloaded for free from Google Play™.
(Android™ 4.4 or later)

Advanced functionality and easy to use

Working Closely With You

The new ApeosPort-V series automatically exits from Sleep mode as users approach the device. Two "eyes", using a real-time proximity camera and a pyroelectric heat sensor, detect when a user is approaching and wakes it from Sleep mode so it is ready to use immediately. This clever technology simplifies operational processes and saves both time and energy. What's more, a face recognition camera can tell more accurately who the user is, and prepare the device to suit their particular applications.

Enhanced Convenience with Facial Recognnition

Smart WelcomEyes Advance 2* is able to discern users as they approach the device and detect when they want to use it. It can also recognise user faces and apply that information for fast, simple authentication.
* Optional.

Simpler Scanning Operation

Enjoy improved scanning usability and operation without the trouble of manual and complex setup

1 This technology uses an infrared pyroelectric sensor to monitor thermal changes in the vicinity of the device, to detect a person approaching.
2 The user detection camera verifies human motion, such as the direction their toes are pointing, to determine whether the person wishes to use the device.

3 It also user authentication through face recognition making authentication simple and fast.
* The local authentication mode must be enabled.

Easier scanning for personal use

ScanAuto determines paper orientation and simplex/duplex for you. Destinations for scanned data can be selected from the send history. Moreover, when authenticated, your e-mail address will be automatically input. Skip blank pages and auto-orientation can also be selected.
* ScanAuto is pre-installed, but must be configured before use.

Easy to scan and save file for individual work

Scan Delivery* provides automatic operation to name a file in accordance with pre-defined rule and save scanned data directly in specified folder instead of using PC to save them. You can improve operating efficiency in routine scanning task.

* Optional.

Image Recognition through a Reputable Processor

The technology of human/face recognition camera uses an Image Recognition through a Reputable Processor for vehicle-mounted cameras. Rapid recognition of users enables the device to minimise power consumption, and ensure that it is ready to use immediately.

Linkage with Remote Authentication Servers

ApeosPort is capable to perform authentication management with user account information from authentication server. This reduces administrative burden without requiring administrators to configure authentication settings for each machine. Available services and colours can be restricted on a user basis. By adding a built-in IC Card Reader* to the device, IC Card authentication can be used. This feature can also provide access control to specific functions on the device, enhancing both security management and user convenience.

* Optional. IC Card Reader cannot be used concurrently with Smart WelcomEyes Advance 2.

Working Folder

Store scanned documents directly to Working Folder, automatically upload received faxes and send upload notifications by e-mail. Stored documents can be viewed and edited on PCs or smart devices using a web browser or DocuWorks. The enhanced security and management functions allow all information to be securely shared.

Working Folder

With a smart device
- View, register and download documents
- Upload pictures and videos

With a web browser or DocuWorks Desk
- Search, drag and drop

With a multifunction device
- Auto-register received faxes
- Resister scanned documents
- Download and print

* This function requires the Woking Folder Service contract.

Printable from Any Machine on Demand

After a job has been sent to the device, users can choose the "Server-less On-demand" feature to print it from any machine on the network on demand, simply by logging on to the machine. Even if the selected device is in use, users can choose their job from another machine and print it. No dedicated server is required for this feature. It is also possible to use up to five devices in this way by grouping them – for example, by floor or workgroup.
* Optional.

The specified machine is in use. Store data.

On a machine having fewer load on the network, login through authentication, select a stored job, and print it.

Leverage of Timely Information with Paperless Fax

[Receiving]
Received fax documents can be sorted into different device folders by dial number or G3ID. After viewing the thumbnails, users can choose to print only designated documents. As soon as fax documents are received in a folder, they can also be sent as a fax, printed, sent as an e-mail, transferred via FTP, and transferred via SMB automatically.

[Sending]
Direct Fax (sending fax directly from PC) can also be used. Sent fax documents can also be saved as PDF and sent as e-mail attachments.

[Reject]
Allows administrators to block incoming faxes from certain numbers and anonymous numbers.

Offices Using Five or More Devices

By utilising ApeosWare Management Suite*, administrators can distribute print drivers, restrict use of the device to certain accounts, gather print counts, improve running efficiency, automate distribution processes and manage job logs. These applications make it a simple task to plan and manage usage of the device, while maintaining full security.

* Software sold separately.

User- and environment-friendly

Real Green Solutions

Fuji Xerox is committed to real, measurable green solutions in office environments.
These can be achieved while at the same time improving user convenience and efficiency during operations.

"Smart Energy Management" for Specific Power Use

The new ApeosPort-V series uses Smart Energy Management to power only the functions requested by users. This reduces power consumption and CO_2 emissions. To minimise noise, the scanning and output devices do not generate noise when not operating.

Fast Wake-up of Control Panel

Fuji Xerox has achieved a fast wake-up by improving the software initialisation process. Thanks to Smart Energy Management, users can adjust settings while the device wakes up. The machine responds almost immediately on demand.

Adoption of LED to Save Energy Without Compromising Quality

Fuji Xerox has utilised LED technology for the exposure unit for low power consumption and a smaller print head, which can image at 1200 x 2400 dpi. It also uses fewer moving parts, so it is quieter during operation.

Quiet Operation

Fuji Xerox continually addresses the problem of noise in the business environment. We have introduced advanced technologies to our "Quiet Flagship Model" such as the Duplex Automatic Document Feeder*, incorporating new image processing.

* Duplex Automatic Document Feeder B1-PC

Excellent TEC Value

The ApeosPort-V series has achieved 1.0 kWh[1] for TEC value[2], conforming to International ENERGY STAR® Program standards and reducing power consumption.

[1]: For ApeosPort-V C2276 Model.
[2]: Value measured by the test defined in International ENERGY STAR® Program.

Extra Functionality in Finishing

A "Z Fold Half sheet" folding capability is now available.
Further Finishing Functions with Introduction of C3 Finisher that supports "Tri-fold"

Stapling
Stapling multiple pages documents, such as meeting materials into sets, is available.

Punch
A hole punch process can be used for filing documents in binders.

Saddle Staple
This Single Fold and stapling process is ideal for creating catalogues and booklets.

Z Fold Half sheet*
Z Fold Half sheet is a useful method to combine A3 documents into A4 size.

Tri-fold*
The C-fold is useful when creating materials enclosed in envelopes.

*9: Folder Unit CD1 is required.
*10: 64 gsm paper
Note: C3 Finisher or C3 Finisher with Booklet Maker requires Transport Unit H1.
Note: Finisher A1 can only be attached to ApeosPort-V C3376, C3374 and C2276.
Note: Finisher B1 can only be attached to ApeosPort-V C5576, C4476, C3376, C3374 and C2276.

Selectable Output Trays

When Inner Output Tray ❶ or Side Tray ❷ is attached, tray can be specified per job, i.e. Copy, Print, or Fax. If your organization has several fax lines, tray can also be assigned for each line.

High-Capacity Feed

The new ApeosPort-V series uses Tandem Tray ❸, which can accommodate up to 3090 sheets. In addition, an optional High Capacity Feeder which can hold up to 2030 sheets* of A4-size media (one tray) ❹ is available. It supports large-volume output demands.

* 80 gsm paper.
